

Midterm Multiple Choice Exam - Spring 2026 - Virtual Proctor

- Due No due date
- Points 20
- Questions 25
- Available Feb 6 at 1am - Feb 16 at 12:59am
- Time Limit 60 Minutes

Instructions

GETTING STARTED WITH THE VIRTUAL PROCTOR

DO

- Use the latest version of Chrome.
- Take the Practice Exam to ensure that Honorlock works smoothly.
- Be in a quiet and private location with strong lighting.
- Work at a clean desk or table.
- Use a computer with a webcam, microphone, and a stable internet connection.
- Adjust computer settings to prevent interruptions from pop-ups, phone calls, or notifications.
- Have your student ID or driver's license ready to show the webcam.
- Keep your face in full view of the webcam at all times.

DON'T

- Use headphones, earbuds, or other listening devices without instructor permission.
- Use other programs or open other websites.
- Leave the room for any reason during the exam, unless approved by the instructor.

NOTE: A room scan of your desk and testing environment is required. The video is used to confirm that there are no unauthorized materials on or near the desk/computer, under the desk, or in the room. The room scan must **CLEARLY** show the area on your desk, under your desk, and a 360 degree view of the entire room.

IN THE EVENT OF A PROBLEM

- Click the bubble in the bottom right corner of the screen to chat with Honorlock support.
- Check the [Exam Services website](https://examservices.uiowa.edu/home/honorlock-students)  (<https://examservices.uiowa.edu/home/honorlock-students>) for solutions

EXAM DURATION

- 60 minutes

MATERIALS ALLOWED

- Any type of calculator - provided by student
- Scientific calculator - online
 - to access calculator, locate the toolbar at the bottom of the testing window
- Scratch paper - 1 sheet of blank scratch paper is allowed. Show both sides to webcam during room scan.
- Notes - 1 sheet, front and back; Show both sides to webcam during room scan.

DIRECTIONS

This section of the midterm exam is multiple choice. There are 25 questions, and you will have 60 minutes to complete this portion of the exam through Honor Lock.

This portion of the exam is closed note, closed book, closed internet. The only thing you are allowed is a front and back 8.5x11 in notes sheet, a blank scratch sheet of paper, and a calculator.

This quiz was locked Feb 16 at 12:59am.

Submitted Feb 8 at 4:11pm

This attempt took 47 minutes.

Correct answer

Question 1

0.8 / 0.8 pts

Which of the following variables would be considered an int data type in Python?

- ☐ True
- ☒ -7
- ☐ False
- ☐ 3.5
- ☐ "3.5"

Correct answer

Question 2

0.8 / 0.8 pts

A loop is called a **definite loop** because **it can execute an exact number of times**, and a loop is called an indefinite loop because the number of iterations is not known when the loop starts.

- ☒ 1st blank: for / 2nd blank: while
- ☐ 1st blank: break / 2nd blank: continue
- ☐ 1st blank: continue / 2nd blank: break
- ☐ 1st blank: while / 2nd blank: for

Correct answer

Question 3

0.8 / 0.8 pts

What list output will the following code produce?

```
values = [1,1]
for i in range(3):
    values.append(values[i-1] + values[i-2])
print(values)
```

- ☒ [1, 1, 2, 3, 2]
- ☐ [1, 1, 2, 3, 5]
- ☐ [1, 1, 2, 2, 3, 5]
- ☐ [1, 1, 2, 3, 2, 3]

Correct answer

Question 4

0.8 / 0.8 pts

Which letter would print out? Fill in the correct choice (a, b, c, d, or e).

- ☐ c
- ☐ a
- ☐ e
- ☒ b
- ☐ d

Correct answer

Question 5

0.8 / 0.8 pts

How many times will 'True' print out?

```
x = 21
if x-5 > 15 :
    print('True')
if x >= 21 :
    print('True')
if 3**3 < x + 10 :
    print('True')
if x != 20 :
    print('True')
```

- ☐ 0
- ☐ 2
- ☐ 1
- ☒ 4
- ☐ 3

Correct answer

Question 6

0.8 / 0.8 pts

Using # or “” “” accomplishes what within our Python code?

- ☒ Creates comments for other humans to understand
- ☐ Executes the mathematical operations in the line above
- ☐ Gives the Python interpreter code to execute
- ☐ Automatically prints out to all the variables in our code

Correct answer

Question 7

0.8 / 0.8 pts

Unlike string or number data types, boolean data types can take on only ____ possible values.

- ☒ 2
- ☐ 1
- ☐ 0
- ☐ 3

Correct answer

Question 8

0.8 / 0.8 pts

What does the following code output below?

```
price = 1000
if price > 1500:
    discount = 0.1 * price
elif price > 1000:
    discount = 0.05 * price
else:
    discount = 0.01 * price
print(discount)
```

- ☐ 100.0
- ☐ 50.0
- ☒ 10.0
- ☐ 1000.0

Correct answer

Question 9

0.8 / 0.8 pts

What will the following code print out?

```
expression1 = True
expression2 = False
print((expression1 and expression2) or expression2)
```

- ☒ False
- ☐ 0
- ☐ True
- ☐ 1

Correct answer

Question 10

0.8 / 0.8 pts

What will be the output for **a**?

```
a = 0
for b in range(0,7,2):
    a += b
print(a)
```

- ☐ 8
- ☐ 19
- ☒ 12
- ☐ 10
- ☐ 16

Correct answer

Question 11

0.8 / 0.8 pts

What will the following code print out for **n**?

```
n = 0
while n <= 15:
    n = n+5
print(n)
```

- ☐ 5
- ☐ 10
- ☒ 20
- ☐ 15

Correct answer

Question 12

0.8 / 0.8 pts

What is the output of the following code?

```
phrase = "The black and the gold"
if len(phrase) < 15 or phrase[1] == "T":
    print(phrase[-4:])
else:
    print(phrase[-1] + phrase[-3:-5:-1])
```

- ☐ old
- ☐ do
- ☒ dog
- ☐ gold

Correct answer

Question 13

0.8 / 0.8 pts

Which of the following is not a mutable collection, meaning you cannot directly alter its contents after it is created?

- ☐ {1, 2, 3, 4} (set)
- ☐ [1, 2, 3, 4]
- ☒ (1, 2, 3, 4)
- ☐ {1: 2, 3: 4}

Correct answer

Question 14

0.8 / 0.8 pts

What will the following code output?

```
number_dictionary = {1: "one", 0: "a", 3: "three", "three": 0}
print(number_dictionary[0] * 3)
```

- ☐ 9
- ☐ 333
- ☒ aaa
- ☐ oneoneone

Correct answer

Question 15

0.8 / 0.8 pts

What will this “fun” function print out when the below inputs are given when called?

```
def fun(x, ans = 0):
    if(x==1):
        return 0
    else:
        return (x * ans)
print(fun(2,1))
```

- ☐ 1
- ☐ 0
- ☒ 2
- ☐ 4

Correct answer

Question 16

0.8 / 0.8 pts

Local variables are defined _ **the function body** and **global variables are defined** _ the function body.

- ☐ 1st blank: above / 2nd blank: below
- ☐ 1st blank: outside / 2nd blank: inside
- ☒ 1st blank: inside / 2nd blank: outside
- ☐ 1st blank: anywhere but in / 2nd blank: below

Correct answer

Question 17

0.8 / 0.8 pts

What does the following code print out?

```
scale = "doremifasolatio"
new_scale = "" #empty string
new_scale += scale[8:10]
new_scale *= 2
print(new_scale)
```

- ☐ solsol
- ☐ asolasol
- ☐ asoaso
- ☒ soso

Correct answer

Question 18

0.8 / 0.8 pts

Which of these is not a collection data type in Python?

- ☐ tuple
- ☐ dict
- ☐ list
- ☒ int

Correct answer

Question 19

0.8 / 0.8 pts

When you are calling the do_something function below, which of these is the variable that is assigned the value returned by the function?

```
x = do_something(y, z)
```

- ☐ z
- ☐ do_something
- ☐ y
- ☒ x

Correct answer

Question 20

0.8 / 0.8 pts

This type of parameter in a user-defined function assumes a value if a value is not provided in the function call.

- ☐ Matching input
- ☐ Assumed return
- ☐ Void function
- ☒ Default argument

Correct answer

Question 21

0.8 / 0.8 pts

Infinite loops are possible in ____.

- ☐ for loops over a range of numbers
- ☒ while loops where the condition is always True
- ☐ while loops where the condition is always False
- ☐ for loops over a list

Correct answer

Question 22

0.8 / 0.8 pts

Else if (elif) statements will only execute the code indented and underneath it if the condition next to the elif is True AND ____.

- ☐ The else statement is False.
- ☒ All if and elif statements above are False.
- ☐ All statements in the sequence are True.
- ☐ The elif statement is below the else.

Correct answer

Question 23

0.8 / 0.8 pts

The ____ keyword in Python promptly ends the loop and jumps to the code immediately following the loop.

- ☐ next
- ☐ continue
- ☒ break
- ☐ final

Correct answer

Question 24

0.8 / 0.8 pts

What does the following code output?

```
my_sum = 0
number = 1
while my_sum < 10:
    if number < 5:
        number += 3
        continue
    elif number <= 10:
        my_sum += number
    else:
        break
print(my_sum)
```

- ☐ 7
- ☒ 14
- ☐ 10
- ☐ 5

Correct answer

Question 25

0.8 / 0.8 pts

With user-defined functions, the _____ keyword exits the function block and outputs the results of the function whenever the function is called.

- ☒ return
- ☐ def
- ☐ ()
- ☐ body
